## **RICHMOND REFINERY**

our place in the community

### **Energy and Hydrogen Renewal Project Community Benefits:**

- Reduces Overall Emissions**
- Funds City Services**
- No Cost to Taxpayers**

**Renewal Works for Richmond**

**Dear Neighbor,**

Chevron is working on a plan to improve the facilities at our Richmond Refinery.

The Renewal Project replaces existing equipment with new equipment that is more energy efficient and includes enhanced environmental controls.

By upgrading the equipment at the Refinery, overall emissions will be reduced, making Richmond's air quality even better.

The improvements are expected to generate millions in new revenues for Richmond that could be used to fund city services including public safety, street repairs and youth programs.

The project does not cost the City of Richmond or local taxpayers any money. Chevron will pay the entire project cost.
